Entrepreneur, Investor and Founder and CEO @VirtuseexchangeI have always considered the raw materials to be very Ā ē ā,~ Ā "trendy" markets. They tend to make great moves up and down, often without the fundamental base at the base of oscillations. After almost A decade of subperforming almost every class of asset on the planet, the raw material markets could be heading for resurrection. There are about 50 important materials markets around the world that facilitate investment trade in about 100 primary raw materials. I often saw The historic chart of the raw material index Bloomberg, to verify the range and trend. This index traces more than 20 raw materials in energy, agricultural and valuable metals and fundamentally represents the raw material markets in general. Ā »So what is " Is the current trend? For anyone who has common sense, there is no doubt that raw materials are a class of resources underperforming . The benchmark has dropped over 55% from its peak of 2011 while investors have avoided the asset class. And the best part is that raw materials have an intrinsic value, in general, it is possible to assume their prices They will not fall to zero. Therefore, when some raw materials reach the minimum technical, I see a tremendous purchase opportunities. This strategy below "below", above all, especially if they put it in perspective with the services of the rest of the financial markets. Look at only what happened in shares and bonds. The actions were constantly increasing for the last 10 years and bonds for 8 years. And at the top of that, both are at their highs of all time. I have been trading stock and raw materials for 25 years and in my modest opinion, the goods seem slightly underestimated in comparison. Mark Twain once said: Ā ē ā,~ Ā "History will not always repeat, but often rhymes. Economists have already supported this effect with something called Ā ē ā,~ Ā "HEORY OF THE COMMODITY Ā ē ā,~ Ā "Supercycle", a term coined during 1990, the period of 2008 when most of the raw materials He experienced the growth of two-digit annual prices. For example oil and copper. They increased by 1.062% and 487% respectively during the so-called period Ā ē ā,~ Ā "SupercycleĀ ē ā,~ ā" ē period as a sudden question Emerging markets in Europe and Asia have increased after years of stagnation. Icaniscat, isn't it? I doubt this time the earnings will be extreme as 20 years ago, but the rational in rhyme is still a sound. Right now , there are many topics for the purchase of raw materials, but let me break this up to five: ā. 1. hedge against the risk of events, it is barely any lack of riot in global affairs, and it's almost certain that Geopolitical events also dominate the markets in the near future. If we add natural disasters, economic crises, wars Glitch market and black swans, we can safely proclaim that the only certainty is uncertainty. Everything is reduced to this, the risk of the event negatively affects the actions and obligations, but the goods thrive in such an environment and can act as a potential hedge. 2. 2. when the zagCommodity shares return are usually inversely proportional to the returns of both shares and bonds. So often, when other major asset classes fall, raw materials grow. But there's a grip, this reverse relationship is not perfect. If world economies were to slow down sharply, raw materials would surely have experienced a steep fall. Just look at what happened during the 2007-2009 recession in the United States, raw materials decreased by 40%, which was a deeper downturn of stocks.3. LiquidityCompared to other asset classes such as property, commodity trade is very liquid. You can exchange them as a physical spot, in the document as futures, ETFs or CFDs, and in crypto form as synthetic goods. The result? It is easy to buy and sell a commodity and you can liquidate your position whenever necessary.4. Protection against inflation Communications are directly proportional to corporate debt, which means it will move with debt. The US government debt has reached 108% of GDP and other developed countries are no better. That's what I mean. Money printing usually results in inflation and raw materials are one of the few classes of activity that benefit from inflation. Having few raw materials in your portfolio will definitely help you beat the market. 5. Potential for more returns And at the top of all this, there is my favorite topic "trend-following". How does it work? You can take advantage of volatility to earn huge profits. Just look at the chart above and you realize that this could be the best time for creating goods portfolio. The bottom line is that after long years of underperformance and cumulative losses for a total of more than 50%, the resurrection of material goods is imminent. And it is often when the feeling is near the rocky botom that reevaluates a potential investment. Ras Vasilisin is the founder and CEO of Virtuse Exchange, a Singapore-based platform that allows investors in more than 100 countries to trade goods. For more information visit and subscribe to www.virtuse.com. Join Hacker Noon How to properly tie a tie turns out to be a challenge well in adulthood. Because so many people have difficulty remembering the steps to the process (and need to look for instructions whenever they attend a formal function), we found a way to memorize how to tie a tie. Similarly many children learn to tie their shoes with a story, just follow this simple rhyme: Imagine in your house a cat and a mouse. While the cat sleeps, the rat shakes past. The cat wakes up and chases. The cat jumps, with dinner on sight. Around the chair, not once but twice. While the mouse hides, the cat looksWitch as it could, poor cat is locked tight. Just imagine that the width end of the tie is the cat, and the narrow end is the mouse. The video above explains how every part of the rhyme instructs you what to do, and because it is so simple, we taught a 5 year old child to do it, all alone! The maternal school rhymes help us learn the basics of the language during ours Years of childhood - but now that you have passed your diapers, you may have noticed that many nursery rhymes don't make sense for our modern ears. Pop is weasel? Since when do they do donispendi?! This disconnection can be partially explained by history: many nursery rhymes are hundreds of years, and therefore involve obsolete sentences of phrase. Disconnecting the weasel, for example, was actually the 18th century gergo to go crazy your coat, making all the bridal rhyme in rhyme an irreverent song on the sale of your jacket to allow me an evening out of town. That is not exactly a traditional story to tell children. And the strangeness of traditional nursery rhymes does not end there: some apparently innocent ribbons actually contain sensorite references to political events of the day. "Georgie Porgie" (who kissed the girls and made her cry), for example, is not a child too affectionate, but rather George Villiers, a favorite of King England James I who seduced a lot of women and ran from Their irate husbands. And "Maria, Mary, rather contrary" can be Maria Regina of Scozzejgi or Maria I, known as Bloody Maria - and the silver bells, cockle shells and the "beautiful waiter" were not gardening tools, but rather the Catholic Queens torture used to persecute Protestants. Whoops. For stories that are a fundamental part of most of our childhoods, the nursery rhymes are often brazenly strange once you start thinking about them. Here are 12 of the strangers, with their revealed bizarre meanings. Some are simply foolish, some are violent and inappropriate for children; But you may want to think twice before playing any of them the next time it's babysit.1. If you sneeze on a MondayWinsor McCay / wikimedia commonsiff that we find Monday, sneezing for danger; Sneezing Tuesday, kisses a stranger; Sneeze on Wednesday, sneezing for a letter; Thursday sneeze, something better. Sneezing a Friday, sneeze for pain; Sneezing a Saturday, joy tomorrow. What is very immediately: Fortuna.Sneezing is an act with a superstitious undercurrent in many cultures. The traditional Flemish belief that a person who sneezes in a conversation will demonstrate that he is saying the truth, according to historians in 1919 - and you could say Ā ē ā,~ Ā "Blessed you 'even if you don't believe in the devil. The nursery rhymes that aim to "teach" to us on superstition are not all rare ones, but this is so out-there takes the cake (or the handkerchief.) 2. Little Jack Jelfunknown Engraver / Wikimedia CommonsLittle Jack Jelf Ā It was put on a shelf because he couldn't write "cake"; When aunt, Mrs. Grace, saw him painful him, he could not help but say: "Oh, Fie!" What is it: body punishment at school. There Jack left quite slightly āē "In the 17th and 18th centuries, British pupils were often subjected to intense corporal punishment when they could not master their lessons. Apart from the famous Dunce cap (named by the Scottish intellectual John Duns DunsAccording to the Stanford Encyclopedia of Philosophy, whose teachings were considered so absurd that its name became synonymous with stupidity), the school boys could be "burned" (hickory), hit with a hickory stick, or get out with signs around the neck. The "exploitation", in this case, was the shelf or corner around the teacher's desk, where poor students could be exiled so that everyone would fix them for the rest of the day.3. A Carrion Crow Sat on an oakA corvo carogna sitting on an oak, fol de riddle, lol de riddle, hi ding do. Looking a tailor forms his cloakCanto heigh-ho, the corvo carogna, Fol de riddle, lol de riddle, hi ding do!Mogle, bring me my old how bent, fol de riddleon, lol de riddle indovinnello Sing heigh-ho, the corvo carogna. Fol de riddle, lol de riddle, hi ding do!What is it really about: Bad luck. Carrion crows are just another name for ordinary crows, and seeing a single crow or cat was long believed to cause bad luck, for the Oxford Dictionary of superstitions. This belief that the crows bear bad luck is also the basis of that other strange philanthropist, "One for pain/Two for joy/Three for marriage/And four for death", who teaches the listener what will happen if he encounters different amounts of birds. So the tailor of this rhyme was not thirsty for blood, but he was just trying to protect himself from the powerful misfortune that the crows had to carry with him.4. LadybirdBlanche Fisher Wright/Wikimedia CommonsCoccinella, ladybird, flies home. Your house is on fire and your kids are gone, except for one named Anne. Because she's creeping under the pan. What it really is about: people who are burned on the stake (perhaps). This dates back to at least 1744, according to the British Library, and we still do not know what it is. Some theories argue that it might be Catholics burned on the stake if they had been caught saying anti-protective England Mass. It may also be about how to kill a ladybug (a.k.a. a ladybug) was considered bad luck. But the one or the other way, it is a singularly unknown thing to recite when an unfortunate insect seems to land just on your cardigan.5. Tell that to Tale TitAlfred Schmidt/Wikimedia CommonsFrom Tale Tit, they will cut your tongue; and all the dogs in the city will have some. What it really is about: What happens to the spions. This rhyme is basically a threat. The word "reporting", which originated around 1540, is a fairy tale, "and as evidence this rhyme, the people who went to the teacher to denounce the malice of others have never been particularly popular in the playground. This was a rhyme sung by children to terrorize other children to gossip. Ethat it was effective.6. The oranges and lemons say the bells of San ClementeAgnes Rose Bouvier/Wikimedia Commons»The oranges and lemons», say the bells of San Clemente«You owe me five cents», they say the bells bells bellsSt. MartinâĀ "When will you pay me?" say the bells of the Old BaileysĀ "When I'll get rich", say the bells of ShoreditchĀ "When will it happen?" say the bells of StepneyĀ "I don't know", say the big bells of BowHere's a candle to light Get you to bed.Here's a helicopter to chop off your head.Chip chop chip chop Ā the last man dead.What it's really about: Convicted criminals.This London rhyme (which is where all those churches are) It is believed by many to derive from the traditional poem recited to convicts locked up in Old Bailey Prison the night before their death, according to the BBC. According to legend, a clergyman holding a candle in one hand and ringing a bell with the other recited a different version of the poem ending with: "And when the bell of the Holy Sepulchre rings in the morning/May the Lord have mercy on your souls". 7. Peter, Peter, eater of PumpkinsWilliam Wallace Denslow/Wikimedia CommonsEper Weeper, a chimney sweeper, had a wife but couldn't hold her. He had another one, he didn't love her, and he pushed her up the chimney.Peter, Peter, a pumpkin-eater, had a wife, and he couldn't keep her; he put her in a pumpkin-shell, and kept her there very well.What it really is: Murder.The wife who "couldn't be held" in this rhyme, which the Oxford The notes of the nursery rhymes dictionary first appeared in 1790, didn't keep running away or anything else. Rather, she was presumably a prostitute. Some historians believe that Peter, the pumpkin eater, got tired of his wifeâs extracurricular activities, then killed her and hid her body in a pumpkin. An even more outrageous interpretation of Peter, pumpkin-eating Peter, is that he's the 13th-century English king, who famously tore up the wife of a rebel nobleman in a wall to starve to death. 8. Baa Baa Black SheepDorothy M. Wheeler/Wikimedia CommonsBaa Baa Black Sheep,Do you have any wool?Yes sir, yes sir, three bags full. What it is: Taxes on wool.The BBC reports that this nice rhyme is actually about a controversial tax on wool imposed in England in the 13th century by King Edward I, who divided the profits from the sale of wool into three parts and gave only one third to the farmer. It was understandably unpopular: Black sheep have been considered unlucky in general because their wool cannot be dyed, and in Scotland, the birth of a black-faced sheep can herald ruin throughout the year. 9. Ring A Ring A RosieMissouri History Museum/Wikimedia CommonsRing-a-ring-a-roses,A pocket full of poses.A-tishoo! A-tishoo! We all fall!What it's really about: the plague or not.Since the 19th century, this rhyme has been said to be about the Black Death, or Black Death.Roses and poses are ringed eruptions and boils of bubonic or pneumatic plague, and the fall represents death. The Library of Congress. It reports that there are very few tests to support this, and that it could only be a sweet game in which children children to exchange flowers. The 10. Goosey Goosey GanderGoosey gander,Where should I wander?Upstairs and downstairsAnd in my lady's room.The 11. I met an old man who didn't want to say his prayers, so I grabbed him by the left leg and threw him down the stairs. What it's really about: Hidden priests.The BBC points out that it could be traced back to a time in England when Catholicism was outlawed. Catholic priests had to say their Latin Masses secretly in private homes, and hide in secret rooms or "priest holes" when Protestants came to knock. And they'd risk a lot more than being knocked down if they were caught. 11:00. Here we walk around the mulberry bushPeter Newell/Wikimedia CommonsHere we walk around the mulberry bushThe mulberry bushHere we walk around the mulberry bushOn a cold, icy morning!What it's really about: Prisoners jogging.According to the historian RS Duncan, this rhyme comes from Wakefield Prison in England, where the inmates practiced jogging around a mulberry bush outside, singing this as they went. The tree lasted until 2019, but the rhyme may have originated in the 19th century. The 12. Who killed Cock Robin?Who killed Cock Robin?" "I", said the sparrow, "With my little bow and arrow, I killed Cock Robin".Who saw him die?" "I", said the fly, "With my little eye, I saw him die".What is it really about: Of the pagans or Robin Hood.This is so weird that no one knows enough what to make of it. Some believe it was created in reference to an ancient pagan god of England, King Holly, who was symbolically "killed" every winter. Or could it be the death of the Norse god Balder, god of light and purity, struck by an arrow made of mistletoe? Could it be written in honour of British Prime Minister Robert Walpole, also known as Robin? Or Robin Hood? Historians are not sure, but the image of every bird around (more, for no apparent reason, a bull) doing an elaborate funeral for a killed bird is a perfect combination of the bizarre, grotesque and violent images that are common in rhymes.
